

**Town of White Lake
Wastewater Report
Fiscal Year 2022**

The Town of White Lake provides wastewater services at an affordable cost while managing our program in a financially sustainable manner. We never lose perception of the inevitable health and environmental cost of failing to ensure that the Town's wastewater options have sufficient financial resources to protect the public.

The Town of White Lake has approximately 2500 sewer connections. Several of these connections are multiple connections for businesses, motels and campgrounds.

The Town has and continues to perform inspections and tests of the sewer system in an effort to locate needed repairs and have made point repairs to help eliminate inflow problems. The Town's engineering firm has begun to repair and/or replace outdated sewer lines during a sewer infrastructure rehab project. Construction was started summer of 2020 and will be ongoing until sometime in 2023. The Town is continuing to apply for grant funding to rehab the sewer collection system.

We are pleased to report that our wastewater treatment system is operating at maximum efficiency and maximum cost effectiveness. All monitoring data for the 2022 year was in compliance with state environmental standards.

Questions or concerns should be directed to Kevin Taylor at 910-862-4800.

The Town of White Lake holds a public meeting the second Tuesday of each month at 7:00 pm in the Council Chambers at 1879 White Lake Dr., White Lake, NC.
